TRANSFER Architecture Video Award 2023

Purpose

The *TRANSFER Architecture Video Award* is an independent award, launched in 2019, to recognise the most creative and innovative short films in the field of architecture, city or landscape worldwide. Video is becoming increasingly instrumental in analysing architecture and the human environment, and is directly related to the digital networks that underpin contemporary communication. With the *TRANSFER Architecture Video Award*, we aim to highlight the contributions that best represent new means of knowledge and analysis of architecture using video as a support.

Criteria

The main criteria are the short film's contribution to exploring innovative ways of analysing and experiencing architecture, city or landscape, the relevance of the topic and its social impact, and a high standard of production. Short films must have a maximum duration of 5 minutes and must have been produced within the past three years (2021-2023).

Participants

The award is global in scope and open to filmmakers, architects, artists, photographers or any individual or group whose video work is related with architecture, city or landscape.
